

Dear Teachers,

During homeroom time, I usually give my students a journal as we wait for everyone to log in. Today's journal was the following prompt and I thought that I would share some of the responses with you to help make your Thursday a little bit more thankful.

Prompt: During this distant learning, what do you appreciate the most of your teachers?

1. I appreciate that they are trying to stay calm while they figure out a way to have these online classes. Also, it must be hard not to have your whiteboard or other supplies but still they find a way to make everything work. I appreciate how Ms. Hernandez is being so calm and when someone doesn't understand an assignment she explains again so that we are 100 % sure that we know how to do the assignment. Ms. Jimenez is being very nice and she is helping us find our work easier than before. Mr. B doesn't look like someone who uses technology as much but he is doing his best as we all are. Ms. Romanach is being very clear with the work we have. Mrs. Romanach is being very considerate by giving us something fun to do (paper airplanes). Above all, the faculty altogether has helped us learn even through hard times. We should all be truly grateful.

2. Well I know that this time has been hard for the teachers. Yes, thought I don't like homework and all I have to appreciate the time and effort the teachers put into giving it to me. I would also like to appreciate that teachers are trying their hardest to work with this new online system and figure out how it works. I really appreciate my teachers for this and would love to thank them for everything!

3. During this distance, learning what I appreciate the most is their work and effort making tests, classwork, classes, and more. I also appreciate that you guys answer immediately if we ask a question in teams or outlook. Finally, I appreciate how you are all checking on us to make sure it was not lonely and sad, etc. Thank you to all the teachers we all appreciate you. ❤️❤️

4. I appreciate their patience. Most kids can't log on time to the classes because the teams app is glitching or something like that. And the teachers have a lot of patience because they just say "oh next time can you be a little earlier" and they try to help and fix your problem with the teams app or any other app your having a problem with.

5. I think the teachers do a lot for especially during virtual classes. They are teaching us through a way that they have never seen before. So I think that virtual classes is harder but teachers try to teach us as best as they can. So I really appreciate what teachers do for us during virtual classes.

6. The thing I appreciate the most about the teachers at this time is that they always try to help us no matter what thank you guys very much.

7. The thing that I appreciate most of my teachers during this “virtual” learning is their ability to be able to teach us as well as if we were still in regular school. I also really appreciate how all my teachers are working nonstop to get everything right for our virtual classrooms and how they have a lot of patience with us because our iPads sometimes don’t work.

8. I am very grateful to have all these teachers trying their hardest on putting all these assignments and sending emails and working all day for us. I am very thankful to have these wonderful teachers.

9. During This time I appreciate teachers the most for them helping us in all the work that we do. I also appreciate that they tell us what to do so we don’t have issues when we try to find or homework. In addition teacher also help us a lot because they don’t give us that much homework and they give us a lot of time to do it.

10. I appreciate that they take time too help us even though we can’t go too school. I appreciate all the work they have put in too virtual school. I appreciate the work they have done through technology even though some of them don’t know how too use technology they still try there hardest too help us.

11. I appreciate that our teachers have adapted to online learning and made it easier for us. Also that they have been kind to us even tho it must be very stressful for them.

12. During these times of distant learning what I appreciate the most of teachers is how they organize classes. I appreciate that they take time off their classes and help us learn how to use teams. I also appreciate how teachers are taking a hard step with technology because there are some teachers that don’t really use it to often. I appreciate how teachers are handling online school because it might be harder to submit, start classes, etc.

13. I'm very thankful for the teachers effort to help us understand everything, and even if they don't really like technology or don't like it they still help us in everything. Thank you we love you

14. I appreciate a lot of things that my teachers are doing but I appreciate most that they cooperate with the students and understand more. That is what I appreciate of my teachers.

15. I appreciate all that the teachers do for us because during these tough times the teachers are doing their best to try to help us learn and understand what we have been doing in not virtual class but the real classroom. That is why I appreciate all that my teachers do for us.

16. The biggest thing I appreciate from my teachers is their hard work and effort. Without them, we would not be able to learn or do anything. Even through these tough times, they still work hard and help us. I miss you, TEACHERS!!!!
